

RECYCLED PRODUCTS: Insulation

FACT SHEET

This fact sheet is designed to provide you with information on how locally produced recycled products can be used in place of products made on the mainland or from virgin materials.

InCide® PC insulation is an energy-saving cellulose insulation derived from recycled newspaper. InCide® is installed in attics, walls and crawl spaces of residential and commercial buildings, resulting in up to 40% savings on energy bills as compared to conventional insulation. InCide® contains the fire retardant Boron 10 and will not melt or support combustion. InCide® is the only EPA-approved pest control insulation available on the market. InCide® has an effective 99.8% kill rate against a number of household and commercial pests such as cockroaches, water bugs, ants, silverfish, crickets, earwigs, Palmetto bugs, centipedes, drywood termites and subterranean termites.

InCide®, derived from recycled newspapers, installs quickly and easily.

Recycled Products:

- Hydraulic Planting Mulch
- Insulation
- Oil Change Box
- Pest Control
- Roof Insulation

Local Installers

- Aloha Insulation, LLC
Office: 383-4053
- Hawaii Insulation
Office: 621-6562
License # BC-11150
- Island Insulation Company
Office: 851-7373
License # C- 20820

Manufacturer

- Intech, Inc
Address: 922-C Austin Lane
Honolulu, HI 96817
Tel: 848-7776
